Thanks Douglas.

Sorry about North Dakota. We have explained that granting Class VI primacy to North Dakota helps the II-VI transition issue, but no one is listening to us. Very frustrating.

We'll stay in touch on AEs. I haven't heard anything from GWPC, either.

Subject:

We did get an update by phone through our ARA today about ND Class VI. It sounds like Ken K. and/or Lisa F. want the Class II to Class VI issue settled or at least clarified before AX approval of ND primacy. I will talk with Sadie later today but don't know if she will want to call Peter to get any more information on this.

Also, I have not heard anything more from Kevin on his commitment in Seattle to follow up (with GWPC support) in offering alternatives, etc. to the approach we took in Linc on current

source analysis to address future AE requests. We still don't know the exact timing of the next ISR project in Wyoming needing an AE, but I hope we will be hearing from him soon.

Finally, let me know if you or Holly need more input and/or support in OGWDW's follow up on our future use discussion in Seattle. We would welcome further conversation on this when its appropriate.

Douglas
